- Available in a wide range of Dulux® Powder Coat Colours
- Masterspec Details — Section 4852JB

STRONG AND ELEGANT SAFETY BARRIER

Installed throughout NZ for nearly 20 years, Viking balustrade has proven itself as a strong and reliable safety barrier that is also popular for its choice of stylish finishes.

The Viking balustrade system is a dependable, low maintenance, aluminium and glass barrier system, which is sought-after for both decks and pool fencing. Viking can incorporate either aluminium balusters or toughened glass in a range of styles including fully framed or semi frameless glass balustrade finishes. Further options include the addition of an intermediate rail for a split rail finish.

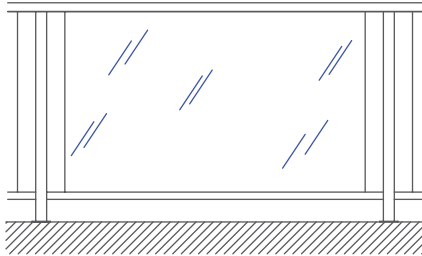

Viking Semi Frameless glass balustrades include a handrail which are either top or front mounted. Top mounted handrails are available in a choice of 4 standard designs – rectangular, classic, round and elliptical. Front mounted interlinking rails are fitted to a bracket, which fixes to the balustrade post face, 100mm below the top edge.

Engineered and tested to comply with the NZ Building Code, Viking balustrade has been designed to fit most NZ building scenarios including installation on modern floating or waterproof decks. Finished in a choice of modern powder coat colours with a 10 or 20 year warranty.

WATERPROOF/FLOATING DECKS

A specially designed fixing bracket is used for the installation of Viking balustrades on floating and waterproof decks, which maintains the integrity of the waterproof membrane. Balustrade posts are fixed directly to the gutter bracket, which is then attached to the boundary joists, clear of the membrane. The gutter is positioned under the gutter bracket and attaches to the fascia using its proprietary brackets and spacers.

Brackets conform to the AS/NZS1170 standard and can be powder coated to match the balustrade posts.

HOMESTEAD® BALUSTRADE

PRODUCT FEATURES AND BENEFITS

- Ready made baluster panels
- Suitable for Occupancy Types A, A Other & C3 Residential
- 5 year warranty on balustrade*
- Conforms to the NZ Building Code and AS/NZ1170 regulations.
- Available in a wide range of Dulux® Powder Coat Colours
- Masterspec Details
— Section 4852JB

PREFABRICATED BALUSTRADE PANELS, READY FOR INSTALLATION

Homestead balustrade is constructed from prefabricated aluminium baluster panels and is ideal for customers requiring a strong, entry level aluminium balustrade.

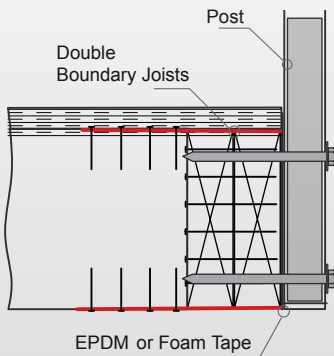

Prefabricated panels are 1360mm wide x 975mm high and can be used on an angle up to 35 degrees (racked). Homestead is for residential applications only, where a barrier is required for a minimum 1000mm height.

Homestead can be top mounted or face fixed with a newel post and is a popular choice for decks, retaining walls and even boundary fencing where a balustrade is required. A specially designed fixing bracket is also available for face fixing Homestead balustrade on waterproof decks, which maintains the integrity of the waterproofing membrane.

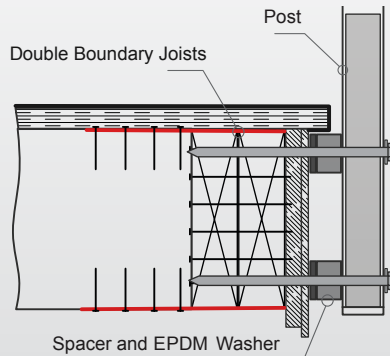

Finished in a choice of modern powder coat colours with a 10 or 20 year warranty.
